

WESTERN ALFALFA

BRAND

SLINGSHOT

Propelling Higher Yield & Quality

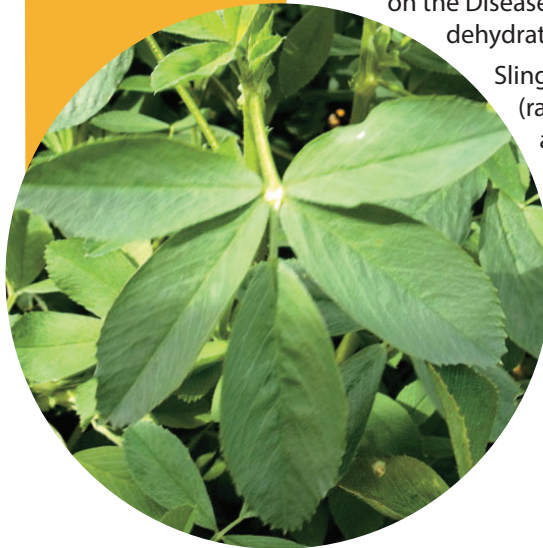

Slingshot is a high yielding fall dormancy 5 alfalfa, bred for winterhardiness. It is well suited to an aggressive multi-cut system. Expressing a high degree of multifoliate leafiness contributes to its impressive quality. Complimented by a perfect 30/30 score on the Disease Resistant Index (DRI) helps propel hay, haylage, green chop and dehydrated product to the next level.

Slingshot is highly resistant to anthracnose, aphanomyces root rot (race 1), fusarium wilt, verticillium wilt, phytophthora root rot, pea aphid, spotted alfalfa aphid, northern root nematode and stem nematode. It is resistant to bacterial wilt. Parental selections came from forage nurseries in Idaho, Washington and Wisconsin.

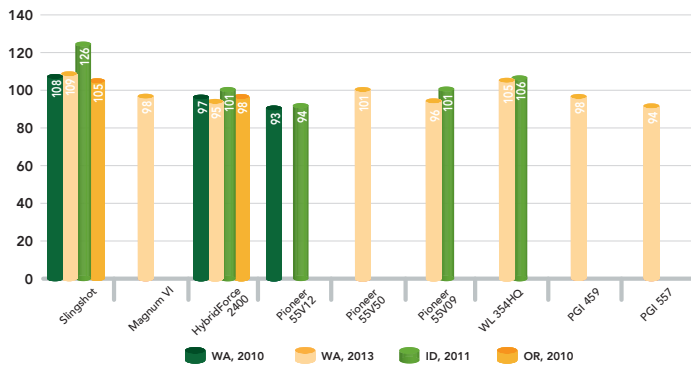

Plants that demonstrated persistence, vigor and disease resistance were selected.

Features:

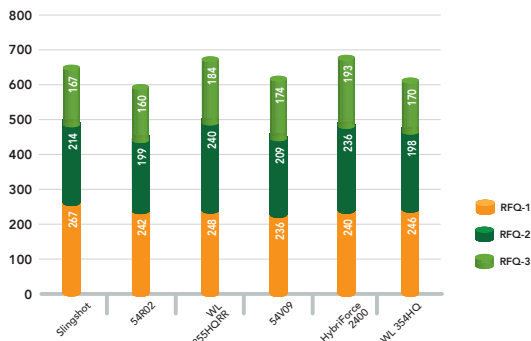

- High Yield
- Winterhardiness
- Aggressive Regrowth
- Disease Resistance
- High Forage Quality

Yield Performance

Feed Quality

Disease Rating

Trait	Rating
Bacterial Wilt	R
Verticillium Wilt	HR
Fusarium Wilt	HR
Phytophthora Root Rot	HR
Anthracnose	HR
Aphanomyces Root Rot	HR
Stem Nematode	HR
Pea Aphid	HR
