

WESTERN ALFALFA

BRAND

SURESHOT

Guarantee faster recovery, persistence and forage yield with Sureshot alfalfa. This fall dormancy class 5 variety is well suited for aggressive management systems such as dry hay or haylage. Its medium to early maturity rapidly emerges and recovers aggressively after cutting. Complimented by outstanding winterhardiness, Sureshot will persist throughout the growing season providing full-season productivity.

Sureshot is a highly productive multifoliate bred for improved forage quality. Noted for its increased Relative Feed Quality (RFQ), you can be confident Sureshot will produce more milk per acre. It contains a comprehensive disease package, including Aphanomyces Race 1 and Race 2 resistance; plus, insect and nematode resistances guarantee your seed investment. Always be on target with your alfalfa selection, hit the mark with Sureshot!

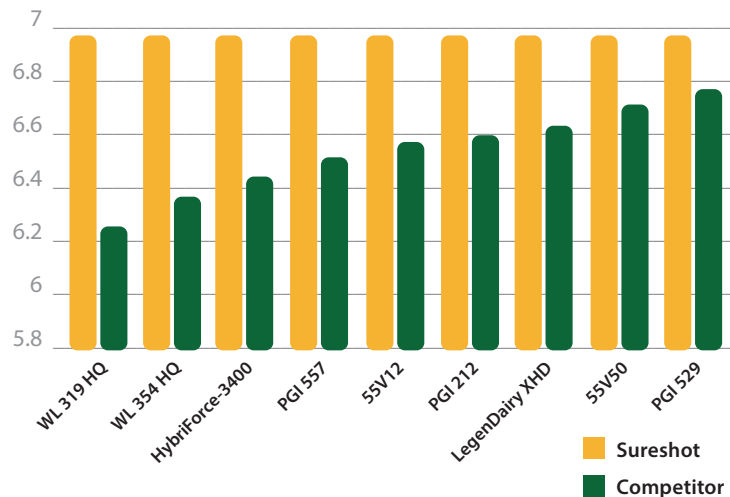

Key Characteristics

- Outstanding forage yield
- Excellent winterhardiness
- Superior persistence
- High milk per acre
- Multifoliate leaf expression
