## BIG BANG

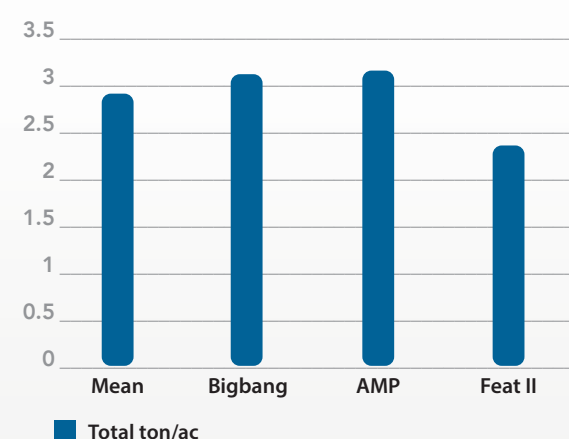

### Performance Rating

### Winter Survival and Adaptation

Trait	Rating
Stern Rust	R
Crown Rust	R

Yield Trial: Seeding of Annual Ryegrass

### Key Characteristics

- Very Leafy
- Tall
- Exceptional Tillering
- Rapid Establishment
- Deep Rooted
- Cold Tolerant
- Tetraploid

ANNUAL RYEGRASS

## OVERLOOK

Overlook's palatability makes this mix suitable for stock health and gain. This four-component perennial grass mix is for western producers to take for haylage, graze or dry hay. Overlook has been tested and proven in the western environment to maximize yield and quality.

### PLANTING/HARVEST STRATEGY

Sow between ¼ - ½" deep into firm seedbed

Full Seeding Rate 25-35 lbs./acre

Pasture/Alfalfa Refresh Rate: 12-15 lbs./acre

Leave 3-4" after cutting for optimal recovery

Harvest for haylage, grazing, or dry hay

### Key Characteristics

- Rapid Establishment
- Excellent Palatability
- High Forage Yield
- Improved Winter Hardiness
- Solid Disease Resistance

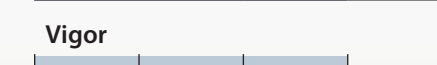

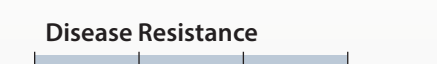

### Western Built Right

- Perennial Ryegrass
- Soft leaf tall fescue
- Orchard Grass
- Italian Ryegrass

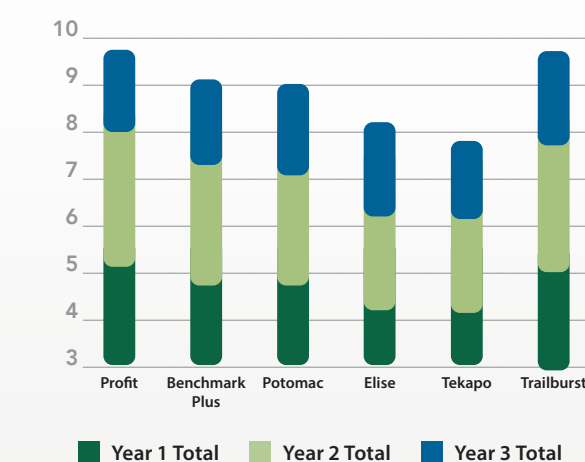

STOCKMAN'S MIX

## TRAILBURST

### Performance Rating

Dry Matter Yields of Orchardgrass

### Key Characteristics

- Superior plant health
- Seedling vigor
- Disease resistance
- High yield
- Outstanding quality

ORCHARDGRASS

## LOOKOUT

Lookout establishes quickly in western soils and stands up to intensive grazing, cutting for hay or ensiling. Built of multiple soft leaf forage tall fescues, Lookout is highly digestible and keeps the cows coming home.

### PLANTING/HARVEST STRATEGY

Sow between ¼ - ½" deep into firm seedbed

Full Seeding Rate 25-30 lbs./acre

Pasture/Alfalfa Refresh Rate: 12-15 lbs./acre

Leave 3-4" after cutting for optimal recovery

Harvest for haylage, grazing, or dry hay

### Environmental Tolerances:

- Good Winter Hardiness
- Moderate Drought Tolerance
- Moderate to High Salinity Tolerance

### Key Characteristics

- Market Leading Yield Potential
- Rapid Establishment
- Excellent Persistence
- Soft Leaf Palatability

### Western Built Right

- Soft leaf Forage Tall Fescue
- Soft leaf Forage Tall Fescue

SL FESCUE MIX

## VANTAGE

Vantage mix was built to maximize dairy output in the West. Its assembly of six high quality, high performing perennial components makes Vantage a must in any dairy ration. Ensilage, hay or graze makes this mix a versatile option in the field and puts milk in the parlor.

### PLANTING/HARVEST STRATEGY

Sow between ¼ - ½" deep into firm seedbed

Full Seeding Rate 25-35 lbs./acre

Pasture/Alfalfa Refresh Rate: 12-15 lbs./acre

Leave 3-4" after cutting for optimal recovery

Harvest for haylage, grazing, or dry hay

### Key Characteristics

- Rapid Establishment
- Excellent Palatability
- High Forage Yield
- Improved Winter Hardiness
- Meets Dairy Quality Needs
- Added Legume component

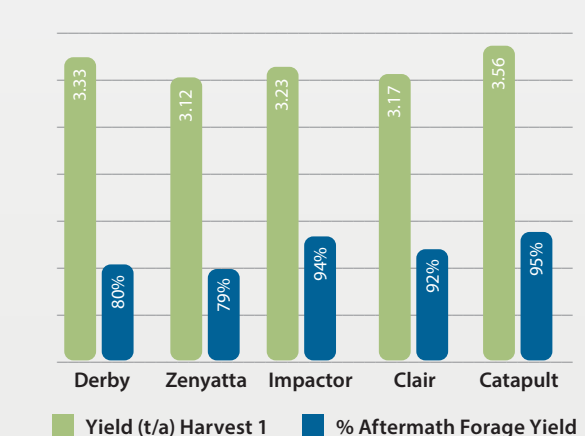

### Western Built Right

- Perennial Ryegrass
- Soft-Leaf Tall Fescue
- Orchard Grass
- Meadow Fescue
- White Clover
- Small percentage of Italian Ryegrass (Nurse crop for the tender perennial seedlings).

DAIRY MIX

Yield Trial: Seeding of Annual Ryegrass

### Key Characteristics

- Dark Green Color
- Large Seed Head
- Compaction Market Specific
- Consistent Performance
- Exceptional Vigor

TIMOTHY

## TRIBAL

### Top Up Your Tonnage with Tribal Perennial Ryegrass

Tribal is a tetraploid forage type perennial ryegrass selected for forage yield, digestibility, and disease resistance. Its yield is characterized by season long persistence and aggressive regrowth, delivering high productivity in multi-cut systems or aggressive grazing programs. Bred from European material, it has improved winterhardiness that is suitable for harsher climates and tolerance to dry conditions.

### Key Characteristics

- Strong Yield
- Aggressive Regrowth
- Digestibility
- Stem and Crown Rust Resistance
- Persistence in tough conditions

PERENNIAL RYEGRASS

## ASCENT

Ascent combines bi-annual medium-late maturing Italian ryegrasses to take yield and quality requirements to the next level. Known for its versatility as a monoculture or inner-seeded into alfalfa/pastures, Ascent brings high protein with high yield.

### PLANTING/HARVEST STRATEGY

Sow between ¼ - ½" deep into firm seedbed

Full Seeding Rate 25-35 lbs./acre

Pasture/Alfalfa Refresh Rate: 12-15 lbs./acre

Leave 3-4" after cutting for optimal recovery

Best harvested as haylage or grazing

### Key Characteristics

- Fast Establishment
- Biennial, Bunch Growth Habit
- High NDF/NDFD Digestibility Scores
- High Protein Content
- 3-4 Cuts in Establishment year
- High Yield Potential

### Western Built Right

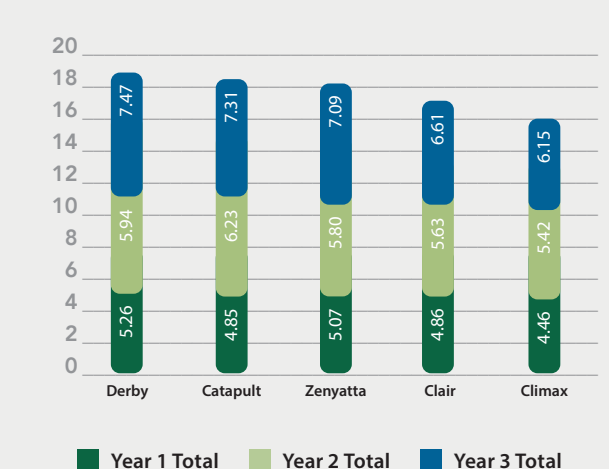

- Italian Ryegrass (tetraploid)
- Italian Ryegrass (diploid)

ITALIAN RYEGRASS MIX

## CATAPULT

Cornell Forage Yield

### Key Characteristics

- Strong Seedling Vigor
- Excellent Summer Regrowth
- Stand Persistence
- Exceptional Yield
- Tall Plant Height

TIMOTHY
